

# ENGINE WARRANTY

## OVERVIEW

This document explains the 1 year unlimited mileage warranty supplied with a reconditioned engine. - Land Rover Discovery 4

VRM:

## TERMS

Thank you for using Dieselheads this limited warranty applies only to the bare engine unit fitted and its internal components, unless other associated parts have also been replaced new or reconditioned i.e. Turbocharger etc. In which case these parts will also be covered under this warranty. The vehicle must be returned to our address for a warranty inspection prior to a warranty repair being carried out, after this inspection we will explain the issue with appropriate detail before we continue.

This warranty will also cover you for any at fault workmanship errors and associated component failures as a result of this.

This warranty will be void if we find a failure for which we are not accountable for during a warranty inspection, this is also applicable if damage has resulted from the following:

- Water ingress/damage
- Work carried out on the vehicle incorrectly either by yourself or another party
- Accident damage

- 
- Non-associated component or ancillary failure - an unrelated part we are not responsible for causes damage to the engine i.e. radiator etc.
  - Aftermarket/performance modifications i.e ecu remapping etc.

If any of the “not accountable” criteria above are found during a warranty inspection you will be charged a labour charge for the reassembly of your vehicle.

**\*Engine oil must be changed at a maximum of 10,000 miles.**

This can be completed with any local garage, proof of this service must be given in any case of warranty where the vehicle has exceeded this mileage.

**\*Warranty is non-transferable.**

For more information please see our [terms and conditions](#).
